142/4,Maharaja Nagar, Tirunelveli, TamilNadu, India

ABOUT ME

I'm a Full Stack Developer who loves building things that actually solve problems.

I move between front-end and back-end with ease, creating systems that are clean, fast, and built with intention.

I'm always experimenting, learning, and pushing myself to understand how things work under the hood. For me, development isn't just writing code it's designing experiences, simplifying complexity, and turning ideas into usable, scalable solutions.

EDUCATION

BTech, Computer Science & Engineering

May 2018 - May 2024

Karunya Institute of Technology and Sciences
B.Tech (CSE(Artificial Intelligence & Machine Learning))

Higher Secondary

August 2024 - May 2028

St. Antony's Public School (CBSE)

WORK EXPERIENCE

2024- Present

Full Stack Developer — Independent Projects

- Build full-stack applications with front-end, back-end, and database components.
 - Create responsive interfaces and develop system-level tools and automation scripts.
 - Work on IoT-integrated projects using Arduino, ESP modules, and cloud platforms.
 - Develop solutions through iterative problem-solving, testing, and deployment.
-

SKILLS

HTML | CSS | JavaScript | Python | MySQL | Git & GitHub | Arduino

ADDITIONAL INFORMATION

Languages: English, Tamil

Certifications: Python, Java, HTML, CSS
